## MINOX RIFLESCOPES

FOR THE BEST HUNTING EXPERIENCE.

Since the invention of the famous spy camera, MINOX is the synonym for the perfect miniaturizing of cutting-edge technology. Today the name equally represents exceptional innovative energy in the field of long-distance optics.

The essence of this expertise flows directly into the development of MINOX riflescopes, offering high-tech for the eye with first class quality for the highest of demands and comprehensive features. Uncompromising in design and production, the maximum possible excellence and precision is emphasized.

Utmost quality, precision, solidity and longevity – these are the achievements of German engineering and constitute the system of values for the MINOX brand.

The exceptional performance of MINOX riflescopes is reflected in the use of high-tech special glass, a precision-designed optical system and premium lens coatings. This combination offers the perfect prerequisite for excellent image quality and high contrast.

All MINOX rifle scope lines are manufactured with the utmost care and reliability to meet the highest of standards.

Your MINOX Team

# ZP TAC

PRECISION FOR PROFESSIONALS.

MADE IN GERMANY

Reliable service is a result of many factors - with the ZP TAC series MINOX delivers a line of tactical riflescopes that combine mechanical precision, optical quality and ruggedness at the highest level. All that combined with innovative, practical features that allow the user to always stay in control even under adverse conditions.

- Complex optical design and special glass provide highest image quality even at the edges of the field of view
- M\* multi-coating on the optical elements provide excellent light transmission, contrast and colour rendition, even in difficult light situations
- 8x e.g. 5x magnification for the highest level of flexibility and precision
- 34 mm solid tube made from aircraft grade aluminum
- Robust and extremely shock resistant construction
- Very large field of view for best overview
- Large eye relief of 90 mm (3.5") for greater safety
- Quickly adjustable diopter adjustment; optionally rubberarmored or out of aluminum if to be used with robust protective caps
- Illuminated reticle for unlimited concentration on the target regardless of the light situation, with automatic deactivation after 3 hours (ZP8), 6 hours (ZP5)
- Waterproof down to 15 m (49 ft.) - argon gas purged and fogproof
- Sophisticated tactical reticles for every situation
- Reticles: MR10+, MR10, A8-D, MR5, MR2, Mildot

## ZE-i

PRECISION "MADE IN GERMANY".

  
MADE IN  
GERMANY

## ZX5

CONVINCING PERFORMANCE.

The ZE-i Line riflescopes are the result of a skillful combination of brilliant precision optics and solid, reliable mechanics. Decades of German engineering know-how and the selection of high quality materials provide the essence from which the excellent optical sights are made.

- Special optical high-tech glass for excellent image quality and outstanding light transmission
- M\* multi-coating on all optical components for excellent light transmission, contrast and color rendition
- 5x magnification for maximum flexibility and precision
- 30 mm tube
- Solid, extremely shock-resistant aviation aluminum housing
- Large field of view for quick aiming and greater certainty
- Reticle at the 2nd focal plane
- Greater safety with an eye distance of 100 mm (3.9")
- Infinitely variable reticle illumination for quick and precise aiming to allow full concentration on the target by day or by night
- Position sensor automatically deactivates the illumination, or after 2 hours\*
- Spare battery integrated into the reticle adjustment drum
- Quick adjusting, rubber coated ocular
- Precise elevation and windage adjustment, as well as parallax compensation (SF models)
- Filled with high grade Argon gas to prevent fogging
- Waterproof and fog free internal lenses
- Also available with the MINOX Z-Rail
- Reticles: German #4, BDC, Dot

MINOX has set new standards in precision, quality and reliability with its powerful riflescope models in the ZX5 product line. The 5x magnification and the 30 mm riflescope tube offer the user maximum flexibility and precision for short and long-range shooting distances.

- Special optical high-tech glass for excellent image quality
- 5x magnification for maximum flexibility and precision
- 30 mm tube
- Solid, extremely shock-resistant aviation aluminum housing
- Reticle at the 2nd focal plane
- Greater safety with an eye distance of 100 mm (3.9")
- Infinitely variable reticle illumination for quick and precise aiming to allow full concentration on the target by day or by night\*
- Automatic deactivation of the reticle illumination after 2 hours\*
- Precise elevation and windage adjustment (1/4 MOA, 5-25 1/8) as well as parallax compensation (SF models)
- Filled with high grade Argon gas to prevent fogging
- Waterproof and fog free internal lenses
- Reticles: PLEX, BDC

# ZV

PREPARED FOR EVERY SITUATION.

The excellent optical performance and reliable mechanics perfectly meet the demands of any hunter looking for a quality piece of gear. Equipped with fully multi-coated lenses, 1 inch tube and 3x zoom range, the MINOX ZV riflescopes are the ideal solution for use in every situation.

- Outstanding optical performance and mechanics
- Fully multi-coated lenses
- 3x magnification
- 1 inch tube
- Lightweight aluminum body
- Long, safe eye-relief
- Reticle at the 2nd focal plane
- Precise elevation and windage adjustment, as well as parallax adjustment (SF models)
- Waterproof and nitrogen purged to prevent fogging
- Reticles: PLEX, BDC 400
